Description: _____

NOTES:

T8, STPH1 Starting, there are many roots.
Big root on the south side so we are opening up
more to the North/south. Then we opened up another
one to the North because roots were preventing
us to excavate deeper. Opening another one to the North
there are many roots that have to be cut up. 25cm we
found what appears to be part of a turtle shell as
well as a glass fragment. There are also bits of charcoal.
The soil is very damp. Water was found at 95 cm
we stop due to water

Description: _____

NOTES: First 10cm is infiltrated with many small root inclusions. It's very barren, & rather sandy. The next 10cm remain pretty much the same. As we go deeper, the cultural deposit stays the same, sterile. There is little change in the soil as well. It is getting slightly damper as we approach 50-60cm. Only natural matter present (roots, seeds, twigs). At 70cm, we encountered bigger, tougher roots. Soil seems to get a little lighter. At 87cm, too big of roots, could not dig any further.

NOTES:

Roots are in a high concentration throughout the STP. They decrease in density slightly towards 60 cm. The soil is loose + sandy. The STP is sterile so far at 80 cm. Fragments of natural shell scattered throughout. Just a few found, shell not common or in high concentration. Soil is barely moist, mostly just loose + sandy. STP completed at 100 cm + sterile.

Description: _____

NOTES: 25 meters NE of STP5. Lots of loose organic debris on the surface of the ground. Fine, sandy soil and lots of shells. Dark gray topsoil. Larger shell fragments. [60 cmbs] Soil change to a light gray, gritty sand. Slightly more damp. Still finding shells (more complete). [85 cmbs] Soil change to an orange-ish brown. Became more compact and moist. Soil is more structured.

Crew Chief's Review & Approval: AA

Principal Investigator's Approval: _____

85 cmbs - found shell fragment with holes on each side. Most likely natural.

NOTES: Soil is compact and extremely hard to get through. There are an abundance of rocks blocking ~~excavation~~^{STP}^{EP}. We ran into compacted marl lain over with gravel. The area with this STP was a parking lot associated with the old security building. Gravel was filled in over the marl. Marl uncovered at 21 cm.
